Description

Where to get more help

Sleep

Sleeping is important for busy days at school.
The average 4-year-old should be getting 11.5 hours of sleep per night.
Help your child to get into a good routine early.
A consistent routine for bedtime can help promote better sleep which is important for children's overall health and wellbeing.
Establish a regular bedtime and have a predictable routine such as a bath and shared story.

Sharing books

Share stories with your child.
Encourage them to turn the pages.
Choose books that they will be interested in.
Talk about the pictures and comment on them.
Look at stories about starting school together.

How to prepare your child for school

Talk positively about school.
Use their teacher's name at home.
Count down the days to help them feel more prepared.
Notice how they may be feeling and help them share this with you.
Help your child to be able to ask for help.
Support your child to feel confident that any familiar comforting items will be waiting for them at home.

Get moving

An average 4-year-old should be doing at least three hours of physical activities a day.
Take your child out for physical activities and to the local park.
Try to practice the route to school and reduce use of a pushchair to help them be independent and confidently walk into school.
